JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Anderson's Birds of Winnebago and Hancock Counties, Iowa.¹ — This is a carefully annotated list of 218 species, based on six years' observations by the author, mainly in the immediate vicinity of Forrest City, Iowa, about seventeen miles south of the Minnesota boundary, and on the meridian of Des Moines. Two pages of introduction describe the topography of the region. The author states that "no species is enumerated of which the identification is doubtful," most of the species having been personally observed or collected by him. Credit is given to other observers for notes on several species which have escaped his notice. In a list so generally free from typographical errors, it seems strange to see *Dendroica* spelled *Dentroica* in each of the nine cases when it is used. — J. A. A.

Ricker's Notes on the Birds of Hull, Mass.² — The *raison d'être* of this annotated list of some 76 species is not very evident, based, as it admittedly is, on rather limited observations. Hull is of course a very restricted locality, and not especially favorable for birds, which may to some extent account for the very small number of species here recorded. The list contains nothing noteworthy on account of rarity or otherwise, while many of the species are not very positively identified. — J. A. A.

Howe's Birds of Brookline, Mass.³ — One hundred and thirty-six species have been noted during the last six years within the town limits of Brookline, Mass. The list is briefly annotated, from the notes of Mr. Howe and five other well known observers. The haunts of a number of species have been recently destroyed, and the birds forced to seek other resorts; yet 72 species are recorded as regularly breeding within the town limits, and 47 occur as regular migrants. — J. A. A.

Tegetmeier's 'Pheasants.'⁴ — This authoritative manual, now in its third edition, has long been recognized as a standard work on the hatch-

¹ An Annotated List of the | Birds | of | Winnebago and Hancock Counties, Iowa. | — Being a List of Birds Observed in the Counties of | Winnebago and Hancock, State of Iowa, with Brief | Notes on the Same. | — | Forest City, Iowa. | Printed by the Author. | 1897. — 16mo, title page, pp. i, ii, 1-19.
